

FRANCISCO FUENTEALBA CHOMALÍ

Full-Stack Developer — JavaScript / Node.js

Santiago / Maule Region, Chile · +56 9 3462 7044 · yeib@pm.me

cv.yeib.cl · yeib.cl · github.com/yeib · linkedin.com/in/yeib

PROFESSIONAL PROFILE

Full-stack developer with a degree in Computer Programming (2018), who returned to software development full-time in 2026 at a very fast pace: in just a few months, built and published 8 desktop applications on the Microsoft Store, 3 open source projects on GitHub, a real-time financial monitoring platform, and a corporate website for a real client. Solid foundation in modern JavaScript (ES6+, async programming, REST APIs) across both backend and frontend, with skills directly applicable to Node.js and Express. Complements this profile with 7 years of prior experience in information management and digital projects in the public sector.

SOFTWARE DEVELOPMENT EXPERIENCE

Independent Full-Stack Developer

January 2026 – Present

Freelance / Personal Projects — Chile (remote)

- Development of web platforms with continuous real-time data ingestion (prices, exchange rates, economic indicators) and in-memory caching architectures (Redis) to minimize query latency.
- Built asynchronous Node.js pipelines: scraping and data ingestion automation with Puppeteer/Playwright and Axios, with persistence in MySQL/SQLite.
- Design, development, and deployment of 8 native desktop applications in Rust + Tauri v2, officially published on the Microsoft Store, including their full maintenance cycle (bug fixes, updates, changelog).
- Development of a B2B web platform for a real client (services company, Maule Region): corporate site with centralized content and request management.
- End-to-end management of each project: scope definition, architecture, development, deployment, and support, working independently with no backup team.

Featured Projects:

- Indicadores (indicadores.yeib.cl) — real-time financial monitoring platform: daily scraping of exchange rates, fuel and consumer prices, with caching for low-latency queries and an AI model for trend prediction.
- InkIt (github.com/yeib/InkIt) — open source PDF signing and annotation editor. 100% JavaScript (ES6+) frontend with canvas handling, binary manipulation, and asynchronous processing; public, auditable code. Part of 3 open source projects published on GitHub. This resume was digitally signed using InkIt.
- Limpieza y Jardinería Maule (limpiezayjardineriamaule.cl) — B2B corporate website built for a real client, with centralized service management.
- Freeblioteca (freeblioteca.cl) — digital library with over 285,000 public-domain works, a multi-source ingestion pipeline (Internet Archive, Open Library, Project Gutenberg, among others) with automatic deduplication and sanitization, and integration with a proprietary AI orchestration hub (multiple models with automatic fallback) for bibliographic classification and metadata correction.

Head of Public Library No. 154 of Longaví

March 2023 – December 2025

Municipality of Longaví — Maule Region

- Management of information systems and library cataloging (ALEPH).
- Planning and delivery of digital literacy courses for the community.
- Document management, technical report preparation, and coordination of reading-promotion initiatives.

BiblioRedes Program Coordinator (Libraries No. 38 and No. 74)

January 2019 – May 2022

Mostazal — O'Higgins Region

- Execution of digital literacy and technology adoption programs for the general public and staff.
- Management of the automated circulation and inventory system (ALEPH).

TECHNOLOGY STACK & TOOLS

- **JavaScript & Backend:** JavaScript (ES6+), Node.js, REST APIs, asynchronous programming, PHP (Laravel 11/12), Rust, Python, TypeScript, Java.
- **Frontend & UI:** React 18, HTML5/CSS3, AJAX, responsive/adaptive design, Inertia.js, Tailwind CSS, Alpine.js, Three.js (WebGL).
- **Data, Caching & DevOps:** MySQL, Redis (in-memory caching), Web Scraping (Playwright, BeautifulSoup), Docker, Git/GitHub, Linux/Nginx.
- **Desktop & Systems:** Tauri v2 (Rust), native Windows APIs, native FFmpeg, cryptography (AES-256).

EDUCATION & CERTIFICATIONS

- Computer Programming — IP CIISA (2015 – 2018)
- Google IT Automation with Python — Google / Coursera (Python, Git/GitHub, debugging, cloud, automation)
- Full Stack JavaScript Development Bootcamp V2.0
- Diploma in Digital Transformation — Universidad Austral de Chile (2020)

AVAILABILITY

Available for immediate hire. Open to on-site or remote work, depending on the organization. Compensation in line with role responsibilities and market conditions.
